# Group Project

- **Group of 2 people working on project:**
- In this project, you start from where you left in assignment 2
- You need to include React_Bootstrap and change various html elements/components and use bootstrap components or You can use UI-Material design: https://mui.com/material-ui/getting-started/overview/
- You need to do following modifications for Delete api, not when you try to delete employee and if employee's CurrentStatus is true you need to display message: "CAN'T DELETE EMPLOYEE – STATUS ACTIVE"
- Add one more tab (function), UpComing Retirement, this function will display all the employee whose retirement is coming in next six month. It is upto you how you want to implement it.
- You also need to add an extra filter so that user can filter employees with UpComing retirement based on their EmployeeType (Assume Retirement Age is 65 Yrs)
- **Additional requirements if you are working in group of 3 people**
- Modify Employee Details API, now when you click on the Employee Details, it will also display the no of Days, Months and Years left for the retirement. (ie Date of Joining 1$^{st}$ January 2001, Age at the time of Joining: 40 yrs, Retirement Date: 31$^{st}$ December 2025. So the no of days, months and years from today (20$^{th}$ July 2022) => 9 days, 5 months, 3 years )

**Summary: In this assignment, you will add more stuff into your project. Delete should not delete active employee. Filter Employees with UpComing retirement.**
